SECP2523 DATABASE

SESSION 2024/2025 - SEMESTER 1

ALTERNATIVE ASSESSMENT REPORT: PHASE 2

Name	NABIL AFLAH BOO BINTI MOHD YOSUF BOO YONG CHONG
IC No. / Matric No.	041203010016 / A23CS0252
Year / Program	2 / SECPH
Section	SECTION 01
Lecturer Name	DR. ROZILAWATI BINTI DOLLAH @ MD. ZAIN
Case Study	WBL Project
System Name	KADA COOPERATIVE SYSTEM
Group Name	KODELAB

Table of Content

Content		Page
SECTION C (SQL AND INTERFACE IMPLEMENTATION)		3-9
3.1	SQL Statement (DDL & DML)	3-5
3.2	Interface Implementation	6-9
SECTION D (CONCLUSION AND REFLECTION)		10-11
4.1	Conclusion	10
4.2	Reflection	10-11

SECTION C (SQL AND INTERFACE IMPLEMENTATION)

3.1 SQL Statement (DDL & DML)

DDL Statements

1. Create OTP table

```
1 CREATE TABLE otp (  
2     OTPid INT(10) PRIMARY KEY AUTO_INCREMENT,  
3     OTPCode INT(6) NOT NULL,  
4     expiredTime DATETIME NOT NULL,  
5     isUsed BOOLEAN DEFAULT false,  
6     applicationID BIGINT NOT NULL,  
7     FOREIGN KEY (applicationID) REFERENCES membership_notif(applicationID)  
8 );
```

Output

OTPid	OTPCode	expiredTime	isUsed	applicationID
-------	---------	-------------	--------	---------------

2. Create documentSubmission table

```
1 CREATE TABLE documentSubmission (  
2     documentID INT(10) PRIMARY KEY AUTO_INCREMENT,  
3     documentType VARCHAR(255) NOT NULL,  
4     submissionDate DATE NOT NULL,  
5     status VARCHAR(255) NOT NULL,  
6     applicationID BIGINT NOT NULL,  
7     FOREIGN KEY (applicationID) REFERENCES membership_notif(applicationID)  
8 );  
9
```

Output

documentID	documentType	submissionDate	status	applicationID
------------	--------------	----------------	--------	---------------

DML Statements

1. Insert otp record

```
1 INSERT INTO otp (OTPCode, expiredTime, isUsed, applicationID)  
2 VALUES ('123456', '2025-01-24 12:00:00', false, 41);  
3
```

Output

OTPid	OTPCode	expiredTime	isUsed	applicationID
1	123456	2025-01-24 12:00:00	0	41

2. Insert a document submission

```
1 INSERT INTO documentsubmission (applicationID, documentType,
  submissionDate, status) VALUES (41, 'gaji', '2025-01-24', 'Sedang
  diproses');
```

Output

documentID	documentType	submissionDate	status	applicationID
1	gaji	2025-01-24	Sedang diproses	41

3. Retrieve OTP for a specific application

```
1 SELECT OTPCode, expiredTime, isUsed
2 FROM otp
3 WHERE applicationID = 41;
```

Output

OTPCode	expiredTime	isUsed
123456	2025-01-24 12:00:00	0

4. Update otp usage status

```
1 UPDATE otp SET isUsed = true WHERE OTPid = 1;
```

Output

OTPid	OTPCode	expiredTime	isUsed	applicationID
1	123456	2025-01-24 12:00:00	1	41

5. Retrieve status of document submission

```

1 SELECT documentID, documentType, submissionDate
2 FROM documentsubmission
3 WHERE status = 'Sedang diproses';

```

Output

documentID	documentType	submissionDate
1	gaji	2025-01-24

6. Update document submission status

```

1 UPDATE documentsubmission
2 SET status = 'sah'
3 WHERE documentID = 1;

```

Output

documentID	documentType	submissionDate	status	applicationID
1	gaji	2025-01-24	sah	41

7. Join membership_notif with documentSubmission

```

1 SELECT membership_notif.name, documentsubmission.documentType, documentsubmission.status
2 FROM membership_notif
3 INNER JOIN documentsubmission ON membership_notif.applicationID = documentsubmission.applicationID;

```

Output

name	documentType	status
hihi	gaji	sah

8. Retrieve membership and otp details

```

1 SELECT membership_notif.name, otp.OTPCode, otp.expiredTime
2 FROM membership_notif
3 INNER JOIN otp ON membership_notif.applicationID = otp.applicationID;

```

Output

name	OTPCode	expiredTime
hihi	123456	2025-01-24 12:00:00

3.2 Interface Implementation

The users first are required to enter their email address to reset their password.

Reset Kata Laluan

Emel

Hantar

helpline : 09-7447088 emel : koperasi_kada@yahoo.com

After the user enters their corresponding email, they will be brought to this OTP page. They are required to check on their email to get their OTP code.

Sila masukkan OTP

Sila masukkan kod pengesahan yang telah dihantar ke emel aflah@gmail.com

Tidak mendapat kod? [Hantar semula](#)

Hantar

helpline : 09-7447088 emel : koperasi_kada@yahoo.com

When the OTP was successfully key in, the system will prompt a successful message.

كوتري كاكيتان كاڤا كلنتان برهاد
KOPERASI KAKITANGAN KADA KELANTAN BERHAD

**Kod OTP telah
berjaya
dimasukkan**

helpline : 09-7447088 emel : koperasi_kada@yahoo.com

If the user enters the invalid OTP code, the system will then prompt an unsuccessful message indicating the OTP code was wrong.

كوتري كاكيتان كاڤا كلنتان برهاد
KOPERASI KAKITANGAN KADA KELANTAN BERHAD

**Kod OTP yang
dimasukkan
adalah tidak tepat**

Kembali

helpline : 09-7447088 emel : koperasi_kada@yahoo.com

Next, for the document submission, the user can click the choose file to upload their salary proof.

KOPERASI KAKITANGAN KADA KELANTAN BERHAD

PERMOHONAN ANGGOTA KOPERASI

Maklumat Pemohon

Nama :		Jantina : ☐ L ☐ P	No. Anggota :		
No KP :	e.g : XXXXXX-XX-XXXX	Agama :		XXXX	
Taraf Perkahwinan :		Bangsa :	No. PF :	XXXXXX	
Alamat Rumah :				Jawatan & Gred :	
Poskod :		Negeri :		No. Telefon Bimbit :	XXX-XXXXXXX
Alamat Pejabat (Tempat Bertugas) :				No. Telefon Rumah :	XXX-XXXXXXX
Poskod :		Negeri :			
No. Telefon/Fax :	XX - XXXXXXX				
Gaji Bulanan : RM	XXXX , XX	Choose file			

helpline : 09-7447088 emel : koperasi_kada@yahoo.com

It will then show the user the bellowing page.

KOPERASI KAKITANGAN KADA KELANTAN BERHAD

Hanya menerima dokumen jenis: .pdf

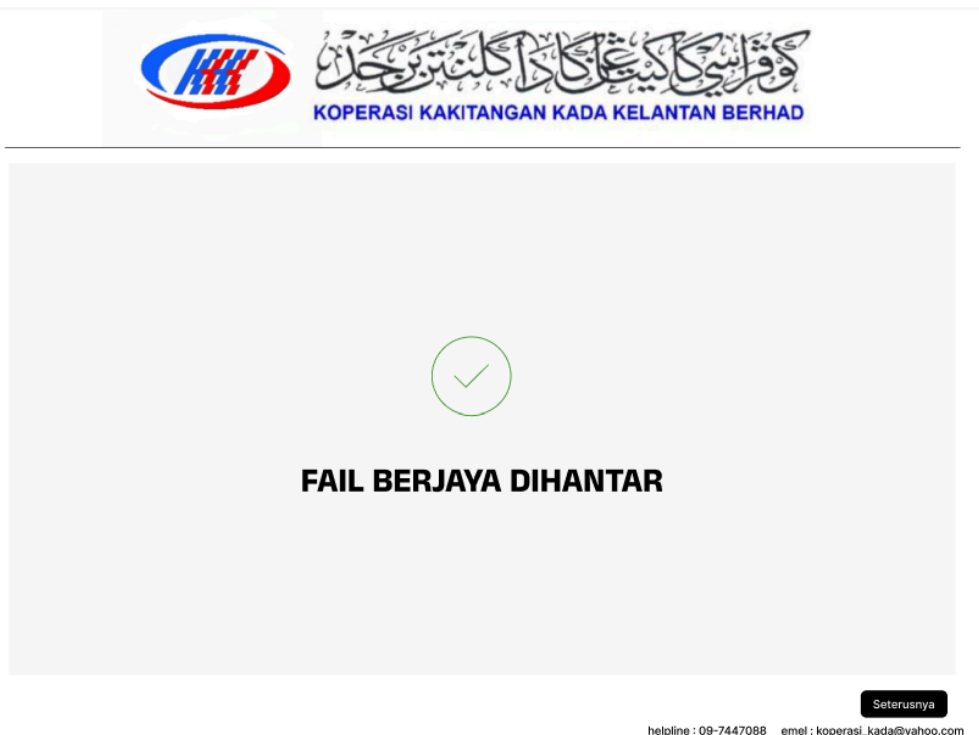

Seterusnya

helpline : 09-7447088 emel : koperasi_kada@yahoo.com

If the user unsuccessfully uploads the document, the system will prompt them the following page alongside with the document criteria.

If the user successfully uploads the file with its criteria, the system will prompt the user with the successful page.

SECTION D (CONCLUSION AND REFLECTION)

4.1 Conclusion

Overall, the new proposed modules which are OTP Module and Document Management Module are aimed to enhance the security and efficiency of the cooperative system. As for the OTP module, it secures the user sensitive information such as password reset and membership application verification. Meanwhile, the Document Management module helps to streamline the membership application process by allowing the user to do online submissions of documents such as in PDF form of document and status tracking. It ensures the validity of the information of the applicant which is a proof to the cooperative to review. Therefore, these modules are important as it helps to improve the user experience and operational efficiency of the KADA cooperative.

4.2 Reflection

In this group project, we are given a task in which we need to help the KADA Cooperative to transform their membership and loan applications into a web-based system which is more modernized and less human work. This project involved all the team members and our client which is KADA Cooperative to be specified, the KADA staff, admin and board of directors to use the new developed system. Our group has come out with several modules for this project which are authentication, membership, loan, statement, admin, report and approval. Each of us was assigned with a different module accordingly and mine is the authentication and membership module. My other teammates, Haani is responsible for the loan and approval module, Adriana is responsible for the report module, Firzana is responsible for the admin module and Pravin is responsible for the statement module.

I felt excited and nervous at the time we received this project as we are doing a system which involves the real client and it also challenges me with the basic implementation of what I have learned in the previous semester. At first when we tried to do the system with the code, there were a lot of errors and there were some difficulties to retrieve our database with the system. However, when I get to retrieve the database and share the news with my teammates, it helps to boost our spirits and keep doing this project until it is successful. We thought there was not enough time for us to finish this project as the industrial day is supposed to be in week 14 but luckily it has been extended to 16 February which we still have time to present a full system to our client.

One of the good experiences about this project is that I get to learn how to develop a system alongside my teammates and with their help on this project, I get to have a clear insight of the system developed. Meanwhile, the bad experience of this project is that one of the teammates doesn't really update his module progress in our team and makes us feel a bit left out with the system progress. The sense of responsibility to fulfill the client's expectations within the limited time made me prioritized more on the project and improved the communication between my teammates. In addition, the short project schedule also had a big impact on me as the system required regular adjustments and attention to satisfy the client. These time limitations enable me to ensure the project is completed on time with the minimum risk.

This incident plays a crucial role in showing how I manage the time schedule while maintaining the system solution according to the cooperative needs. The challenges I have

faced during the development of the system directly influenced me with the pressure of completing the system fully within a limited timeline. This shows that communication is an important key to streamline the work progress. In my opinion, the main area to focus on in the future might be improving time management by planning carefully the work details so as to ensure smoother project execution.

In conclusion, I found out that communication and critical thinking is needed to ensure the completion of this project especially when we are working as a team. Based on what happened, I learned that proper time planning and always updating with the teammates ensures the work progress runs smoothly and helps to reduce the work pressure. Therefore, for the next project, I will ensure all teammates are doing their module given the sprint time to reduce the delays issues to complete the system. Tools like trello or github are useful to improve the task management and progress tracking of the system as long as the team members keep updating and have good communication inside the team.
