Introduction

SKUDAI, June 26, 2025 - The Technopreneurship Seminar: Empowering Innovation Through Emerging Technologies was held on 26 June 2025 at Dewan Kejora, N28A, Faculty of Computing, Universiti Teknologi Malaysia (UTM). This event was organized as part of FCRI Day 2025, aiming to bridge the gap between academia and industry by showcasing the dynamic interplay between technology and entrepreneurship.

Technopreneurship Seminar on June 26, 2025, in N28a Faculty of Computing

The primary objectives of the seminar were to inspire students with real-life success stories in technopreneurship and to provide a valuable platform for them to engage directly with industry experts. The event also aimed to introduce emerging technologies and explore their impact on innovation across various sectors. Additionally, it sought to offer internship and interview opportunities with participating companies, while promoting industry exposure through hands-on showcases and professional networking sessions.

One of the key highlights of the seminar was the presence of renowned industry leaders and innovators who shared valuable insights, real-world experiences, and opportunities in the rapidly evolving tech landscape. The keynote speakers included Mr. Chan Weng Hun, Head of Cloud Core at Huawei GSRC Malaysia, who provided insights into cutting-edge cloud technologies; Dr. Yeong Chee Fai, CEO of DF Automation & Robotics, known for his contributions to industrial automation and robotics innovation; and Mr. Russell Marland, Senior Operations Director at TG Human Resource Management Sdn Bhd, who shared

perspectives on employability and HR strategies in the tech industry. Their sessions were both informative and inspiring, sparking meaningful discussions among attendees.

Seminar happening in Dewan Kejora, N28a

Participants not only gained valuable knowledge but were also rewarded with UTM merit points, KFC and Al-Nawras discount coupons, and the chance to win RunCloud Entry-Level Certifications worth RM1,990. The event successfully highlighted the importance of technopreneurship in shaping future careers and fostering innovation among university students.

Seminar Agenda and Speakers

8:00 AM – 9:00 AM

Registration and Arrival of Participants

Participants checked in and received seminar kits.

9:00 AM – 9:35 AM

Opening Ceremony

Welcome speech by the event coordinator and an overview of FCRI Day 2025.

9:35 AM – 10:35 AM

Keynote 1: “Revolutionizing Business with Cloud Technologies”

Speaker: *Mr. Chan Weng Hun*, Head of Cloud Core, Huawei GSRC Malaysia

In this seminar, Mr. Chan promoted forward-thinking and a global attitude in order to

successfully navigate technological change. He emphasized how the innovation of technology, propelled by robust digital infrastructure is influencing global industry trends. His findings on the digital backbone that is subtly changing the world and served as a strong reminder of the influence and promising of technology in advancing society.

Mr. Chan Weng Hun is giving his speech on Revolutionizing Business with Cloud Technologies

10:35 AM – 11:35 AM

Keynote 2: “Technopreneurship Through Robotics Innovation”

Speaker: *Dr. Yeong Chee Fai*, CEO of DF Automation & Robotics

Dr. Yeong shared his entrepreneurial journey and contributions in the field of robotics. His talk emphasized how automation is reshaping the future of manufacturing and encouraged students to explore innovation through startup ventures.

Dr. Yeong Chee Fai is presenting on robotics innovation, sharing his background and industry journey.

11:45 AM – 12:15 PM

Keynote 3: “Shaping Talent for the Digital Workforce”

Speaker: *Mr. Russell Marland*, Senior Operations Director, TG Human Resource Management Sdn Bhd

In this seminar, Mr. Russell Marland emphasized the evolving needs of the digital workforce. He highlighted that beyond technical skills, employers now value adaptability, communication, and a growth mindset. Mr. Marland encouraged students to build their personal brand through platforms like LinkedIn and engage in lifelong learning via online courses and internships. He also stressed the importance of networking, soft skills, and showcasing real-world experience. By adopting a proactive attitude and continuously upgrading skills, students can better align with industry expectations. His talk inspired attendees to embrace change and take ownership of their professional development in a rapidly evolving job market.

2:30 PM – 5:00 PM

Closing and Certificate Distribution

Lucky draws were held for RunCloud certification vouchers, KFC and Al-Nawras discount coupons, and a photography session.

During the recent Technopreneurship Seminar, the food truck initiative brought a lively and satisfying element to the event experience. Managed by a student-led team, the setup included one food truck and one beverage truck, serving a steady stream of hungry seminar attendees throughout the day. The effort was well received by many, and participant feedback has been both encouraging and insightful.

Many attendees praised the quality and taste of the food, describing it as “delicious” and “worth the wait.” Several noted that the portion sizes matched the pricing well, making it an affordable and satisfying option. Others expressed appreciation for the clean environment maintained around the food truck area, which contributed to an enjoyable dining experience. A designated space to sit and enjoy meals was also highlighted as a thoughtful addition, allowing participants to relax between seminar sessions.

At the same time, the team received constructive feedback aimed at improving future events. Some attendees pointed out that having only two food trucks, one for meals and one for drinks, limits the variety of options available, especially during a high-traffic event. Long queues also became a concern during peak hours, with some guests having to wait under direct sunlight due to limited shade. The combination of heat and long lines affected comfort for a number of participants.

The food truck team acknowledges and values all feedback received. These insights provide a clear direction for future enhancements, such as increasing the number of food vendors, streamlining service to reduce waiting times, and providing more shaded areas for queuing. The team remains committed to improving the customer experience while continuing to offer affordable, high-quality food in a clean and welcoming setting.

This food truck initiative has been a valuable learning opportunity for all team members involved, blending entrepreneurship with real-world problem-solving. The team thanks all seminar attendees for their support and feedback, which will help guide future events toward even greater success.

Key Learnings (Individual Reflection)

Reflection by Jane Ng Jing Ying

Joining the Technopreneurship Seminar as part of the food truck team was a good learning experience for me. I was in charge of cleaning, so I made sure the area stayed clean and comfortable for everyone to eat.

Besides working at the food truck, I also learned a lot from the seminar itself. One important lesson I learned is that good business ideas come from solving real problems. For example, during the event, I saw how long queues and hot weather affected people. It made me realize how important it is to think about customer comfort when running a business.

The seminar also taught me about teamwork and how every role, big or small, matters. Even though my job was simple, it helped the whole team run smoothly. I also learned how important it is to be ready to handle problems quickly.

Overall, I gained new knowledge and skills, especially in teamwork, communication, and customer service. These lessons will be useful for future group projects or business tasks.

Reflection by Ong Jia Yu

As a member of the Food Truck Team for the Technopreneurship Seminar 2025, I was responsible for assisting operations at the food truck area, particularly managing the collection and calculation of student vouchers. Our team worked together to ensure that participants could smoothly redeem their coupons at the selected food vendors VAN KAFFE and BRO SAM AYAM GUNTING.

Throughout the event, I was stationed near the food truck area to help monitor the flow of students and maintain cleanliness and order. I also took charge of collecting all redeemed vouchers and calculating the total value used. This task required careful attention to detail, real-time communication with vendors, and quick problem-solving when minor issues occurred.

This experience taught me the importance of operational planning, teamwork, and responsibility. I learned how small tasks, like handling vouchers and maintaining the site,

play a big part in supporting the overall success of a large event. Most importantly, I realised how technopreneurship is not only about technology and business ideas but also about delivering good service, managing logistics, and creating value through collaboration.

Reflection by Siow Xin Ya

I am grateful to have been part of the Technopreneurship Seminar 2025, where our group served as the Food Truck Team supporting an event themed "Empowering Innovation Through Emerging Technologies." Our mission was to ensure participants had access to quality food and beverages that complemented the inspiring atmosphere of the seminar.

After exploring several options, we successfully brought in two trusted vendors: VAN KAFFE, offering a variety of refreshing drinks and coffee, and BRO SAM AYAM GUNTING, known for their crispy chicken dishes. We worked closely with them to ensure smooth operations and took responsibility for preparing a clean, organized, and accessible food area.

On the event day, we managed cleanliness and assisted with any on-site needs. The experience taught us the importance of coordination, adaptability, and real-time problem-solving. Most importantly, it showed how even small roles like ours can reflect key technopreneurial values. We are proud to have contributed to an event that inspired innovation and empowered future entrepreneurs.

Reflection by Nabil Aflah Boo Binti Mohd Yosuf Boo Yong Chong

Being part of the Technopreneurship Seminar held on 26 June 2025 at the Faculty of Computing, UTM, was a meaningful and enriching experience. As the group leader for Section 1, Group 3 in the Food Truck Team, I was responsible for overseeing several key tasks including designing food vouchers, ensuring the cleanliness and organization of the food truck area, and collecting all redeemed coupons from the vendors.

Although these tasks seemed straightforward at first, they required effective coordination, time management, and constant communication with both team members and external vendors. It was during this fast-paced environment that I truly understood the value of

teamwork, delegation, and staying attentive to small but important details. I learned that good leadership doesn't always come from being at the front but sometimes it's about working behind the scenes to ensure everything runs smoothly and efficiently.

This experience helped me build greater confidence in my ability to lead and manage responsibilities under pressure. It also made me appreciate how even the most operational roles contribute to the overall success of an event. Moving forward, I hope to apply these lessons in future team projects and continue growing both as a student and an aspiring professional in the tech industry.

Reflection by Siti Nurzulaikha binti Azman

As part of the Technopreneurship Seminar 2025 as a Food Truck Team member, it was an informative and productive experience. My role mainly consisted of helping with the management of the operation and cleanliness around the food truck area, but I gained many valuable lessons that extend beyond logistics.

One of the things I learned from this experience is the importance of customer satisfaction in business. I witnessed how people reacted to the food service, and it taught me that excellent technopreneurship is not just about new ideas and technology, but also about understanding and fulfilling customers' requirements. This includes such simple things as having clean spaces for dining, efficient food redemption processes, and possessing a warm place regardless of rain or shine.

In addition, work in a real-world environment assisted in defining my communication and teamwork abilities. Our group needed to work with suppliers, resolve problems on the spot, and keep cool heads. These offered valuable lessons about the importance of each individual's input in overall success.

Overall, this seminar has taught me more than theory it has imparted me with experiential insight, improved my soft skills, and reminded me of my appreciation for the importance of innovation in solving real problems. Thank you for the opportunity to be able to contribute to this meaningful event and look forward to applying these lessons to future academic and entrepreneurial endeavors.

🚚 Grateful for the experience as part of the Food Truck Team during our recent Technopreneurship Seminar! 🚚

I recently joined a Technopreneurship Seminar where I was part of the Food Truck Team. My job was to keep the food area clean and organized. It may sound like a small role, but I learned that every task matters when working in a team.

During the seminar, I also picked up some valuable lessons. I saw how real businesses need to think about their customers as from long queues to the hot weather, every little thing affects the customer experience.

This experience helped me improve my teamwork and problem-solving skills. I'm proud of what we accomplished as a team and thankful for the chance to be part of it.

🌟 Grateful to be part of the Technopreneurship Seminar 2025: Empowering Innovation Through Emerging Technologies held at UTM Faculty of Computing!

As part of the Food Truck Team, I had the chance to support the event's operations by managing voucher collection and helping maintain a smooth flow at the food truck area. It was a great experience in coordination, real-time problem-solving, and teamwork.

This seminar brought together inspiring speakers from Huawei, DF Automation & Robotics, and TG Human Resource Management, who shared insights into cloud technology, robotics innovation, and employability in the tech industry.

Proud to have contributed to an event that promotes innovation, industry exposure, and entrepreneurial spirit among students!

🌟 Technopreneurship Seminar 2025: A Day of Innovation, Learning & Real-World Experience 🌟

On 26 June 2025, I had the privilege of joining the Technopreneurship Seminar at Dewan Kejora, Faculty of Computing, UTM an exciting part of FCRI Day 2025. This event was more than just a seminar; it was a powerful platform that brought together students, industry leaders, and emerging technologies.

As a member of the Food Truck Team, I helped manage the food & beverage area handling cleanliness, voucher redemptions, and assisting vendors throughout the day. Though our tasks were operational, I learned firsthand how even behind-the-scenes roles require strong teamwork, adaptability, and a commitment to customer experience – all of which reflect core technopreneurial values.

🔑 Key Takeaways from the Keynote Speakers:

- 🔹 Mr. Chan Weng Hun (Head of Cloud Core, Huawei GSRC Malaysia)
Shared how cloud technologies are transforming global industries. His talk, "Revolutionizing Business with Cloud Technologies," emphasized the importance of digital infrastructure and forward-thinking in building scalable, future-proof solutions.
- 🔹 Dr. Yeong Chee Fai (CEO, DF Automation & Robotics)
Inspired us with his entrepreneurial journey in "Technopreneurship Through Robotics Innovation." He showed how automation is reshaping industries, and encouraged us to be bold in turning innovative ideas into startups that solve real-world problems.
- 🔹 Mr. Russell Marland (Senior Operations Director, TG Human Resource Management Sdn Bhd)
Delivered a powerful message in "Shaping Talent for the Digital Workforce." He stressed the need for soft skills, adaptability, and a growth mindset reminding us that employers are seeking talent who can learn, lead, and collaborate effectively in a tech-driven world.

📌 What I Gained:
Practical experience in event operations

🌟 📝 Reflecting on an inspiring experience at the **Technopreneurship: Empowering Innovation Through Emerging Technologies**

📅 26 June 2025
📍 N28a, Faculty of Computing, UTM

As the group leader for Section 1, Group 3 in Food Truck Team, I had the chance to play a meaningful role behind the scenes. My team and I were responsible for designing food vouchers, keeping the food truck area clean and organized, and collecting redeemed coupons from each vendor. It may sound simple, but it gave me a greater appreciation for teamwork, coordination, and the effort that goes into creating a smooth event experience for everyone involved.

One of the highlights of the day was the lineup of impactful talks from industry professionals, who shared valuable insights and real-world experiences:

- 🔹 Mr. Weng Hun Chan (Huawei) — Spoke on the vital role of robust digital infrastructure in driving innovation and maintaining business competitiveness.
- 🔹 Dr. Che Fai Yeong (DF Automation & Robotics) — Shared his journey from academic researcher to entrepreneur, emphasizing how turning ideas into real-world solutions drives impactful change.
- 🔹 Mr. Russell Marland (TG Human Resource Management) — Discussed leading through technological change while maintaining a human-centered leadership approach.

The event also featured interactive exhibitions and showcases of emerging technologies across multiple industries, offering us a glimpse into the future of tech and innovation in action.

This experience reminded me that leadership isn't always about being in the spotlight — sometimes it's about showing up, supporting your team, and ensuring every detail contributes to the bigger picture. Grateful for the experience, the insights, and the opportunity to grow both personally and professionally.
